

Towns County Elementary School Online Learning Plan

- Students will have a class schedule of classes just like in the traditional setting. The schedule will be listed in Infinite Campus. This schedule will show enrolled classes and teachers will input grades to the gradebook within Infinite Campus.
- Online Learning will consist of assignments, videos, and some virtual meeting opportunities. A tentative number of each of these components will vary by grade level and are indicated in the table below. Until we know the number of online students we will not be able to make a finalized plan.
- A time will be scheduled for parents to pick up course materials such as textbooks in relation to the scheduled courses.
- Google Classroom will be utilized as the platform for communication of assignments. Google Classroom allows for most assignments to be turned in through the platform. Videos and other materials can be uploaded to Google Classroom.
- If there are instances where physical assignments will be turned in, the assignment will need to be delivered to the front office of the school and left in a specified drop off location.
- There will be assignment expectations daily Monday through Friday.
- Grades will be calculated based on student work in the same manner as traditional school. Similar expectations for quality of work and timeliness will be enforced. Completion of all assignments is expected. Failure to complete assignments will be reflected in the student's grade. Parents can see grades in the parent portal of Infinite Campus.

The following highlights some grade specific expectations for online learning that will be followed the first 9 weeks of school. This is intended to be a summary and could vary somewhat based on the current curriculum being addressed.

	Assignments	Independent Practice	# of Videoed Lessons	Communication	Specials Classes
